NumPy Exercises

Import NumPy as np

```
import numpy as np
```

Create an array of 10 zeros

```
np.zeros(10)
```
    array([0., 0., 0., 0., 0., 0., 0., 0., 0., 0.])

Start coding or generate with AI.

    array([0., 0., 0., 0., 0., 0., 0., 0., 0., 0.])

Create an array of 10 ones

```
np.ones(10)
```
    array([1., 1., 1., 1., 1., 1., 1., 1., 1., 1.])

Start coding or generate with AI.

    array([1., 1., 1., 1., 1., 1., 1., 1., 1., 1.])

Create an array of 10 fives

```
np.full(10,5)
```
    array([5, 5, 5, 5, 5, 5, 5, 5, 5, 5])

Start coding or generate with AI.

    array([5., 5., 5., 5., 5., 5., 5., 5., 5., 5.])

Create an array of the integers from 10 to 50

```
np.arange(10,51)
```
    array([10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26,
           27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43,
           44, 45, 46, 47, 48, 49, 50])

Start coding or generate with AI.

    array([10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26,
           27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43,
           44, 45, 46, 47, 48, 49, 50])

Create an array of all the even integers from 10 to 50

```
aray=np.arange(10,51,dtype=int)
aray[aray%2==0]
```
    array([10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42,
           44, 46, 48, 50])

Start coding or generate with AI.

    array([10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42,
           44, 46, 48, 50])

Create a 3x3 matrix with values ranging from 0 to 8

```
array=np.arange(0,9)
array.reshape(3,3)
```

```
array([[0, 1, 2],
       [3, 4, 5],
       [6, 7, 8]])
```

Start coding or generate with AI.

```
array([[0, 1, 2],
       [3, 4, 5],
       [6, 7, 8]])
```

Create a 3x3 identity matrix

```
array=np.identity(3)
array
```

```
array([[1., 0., 0.],
       [0., 1., 0.],
       [0., 0., 1.]])
```

Start coding or generate with AI.

```
array([[ 1.,  0.,  0.],
       [ 0.,  1.,  0.],
       [ 0.,  0.,  1.]])
```

Use NumPy to generate a random number between 0 and 1

```
aray=np.random.rand(1)
aray
```

```
array([0.42913096])
```

Start coding or generate with AI.

```
array([0.68660432])
```

Create the following matrix:

```
import numpy as np

# Create the 1D array with values from 0.01 to 1.00 with a step of 0.01
array_1d = np.arange(0.01, 1.01, 0.01)

# Reshape the 1D array into a 10x10 2D array
array_2d = array_1d.reshape((10, 10))

print(array_2d)
```

```
[[0.01 0.02 0.03 0.04 0.05 0.06 0.07 0.08 0.09 0.1 ]
 [0.11 0.12 0.13 0.14 0.15 0.16 0.17 0.18 0.19 0.2 ]
 [0.21 0.22 0.23 0.24 0.25 0.26 0.27 0.28 0.29 0.3 ]
 [0.31 0.32 0.33 0.34 0.35 0.36 0.37 0.38 0.39 0.4 ]
 [0.41 0.42 0.43 0.44 0.45 0.46 0.47 0.48 0.49 0.5 ]
 [0.51 0.52 0.53 0.54 0.55 0.56 0.57 0.58 0.59 0.6 ]
 [0.61 0.62 0.63 0.64 0.65 0.66 0.67 0.68 0.69 0.7 ]
 [0.71 0.72 0.73 0.74 0.75 0.76 0.77 0.78 0.79 0.8 ]
 [0.81 0.82 0.83 0.84 0.85 0.86 0.87 0.88 0.89 0.9 ]
 [0.91 0.92 0.93 0.94 0.95 0.96 0.97 0.98 0.99 1.  ]]
```

Start coding or generate with AI.

```

TypeError: 'numpy.ndarray' object is not callable
```

Create an array of 20 linearly spaced points between 0 and 1:

(Hint: Use linspace function)

```python
import numpy as np

# Create an array with 20 values evenly spaced between 0 and 1
array = np.linspace(0, 1, 20)

print(array)
```

```
[0.         0.05263158 0.10526316 0.15789474 0.21052632 0.26315789
 0.31578947 0.36842105 0.42105263 0.47368421 0.52631579 0.57894737
 0.63157895 0.68421053 0.73684211 0.78947368 0.84210526 0.89473684
 0.94736842 1.        ]
```

Start coding or generate with AI.

```
array([ 0.        ,  0.05263158,  0.10526316,  0.15789474,  0.21052632,
        0.26315789,  0.31578947,  0.36842105,  0.42105263,  0.47368421,
        0.52631579,  0.57894737,  0.63157895,  0.68421053,  0.73684211,
        0.78947368,  0.84210526,  0.89473684,  0.94736842,  1.        ])
```

Start coding or generate with AI.

˅ Numpy Indexing and Selection

```python
mat = np.arange(1,26).reshape(5,5)
mat
```

```
array([[ 1,  2,  3,  4,  5],
       [ 6,  7,  8,  9, 10],
       [11, 12, 13, 14, 15],
       [16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

You are given this matrix named mat. Write some code to get the outputs accordingly in the cells given below

```python
#Enter your code here

np.arange(12,26).reshape(7,2)
```

```
array([[12, 13],
       [14, 15],
       [16, 17],
       [18, 19],
       [20, 21],
       [22, 23],
       [24, 25]])
```

```python
#Enter your code here
```

Start coding or generate with AI.

```
20
```

```python
#Enter your code here

array=np.arange(2,13,5).reshape(3,1)
print(array)
print(sum(array))
```

```
[[ 2]
 [ 7]
 [12]]
[21]
```

```python
#Enter your code here
```

Start coding or generate with AI.

```
array([21, 22, 23, 24, 25])
```

```python
#Enter your code here
```

Start coding or generate with AI.

```
array([[16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

Get the sum of all the values in mat

Start coding or generate with AI.

Start coding or generate with AI.

```
325
```

Get the standard deviation of the values in mat

Start coding or generate with AI.

Start coding or generate with AI.

```
7.211102550927978
```

Get the sum of all the columns in mat

Start coding or generate with AI.

Start coding or generate with AI.

```
array([55, 60, 65, 70, 75])
```
